

0.1 The salary function test

The salary function:

$$f(x) = \text{rent} \div 0.3 \quad (1)$$

To estimate the salary: $f(x) = \frac{\text{rent}}{0.3}$, we cannot say this is correct, but it can help people estimate how much money they need to earn based on a easy variable to get, the price to rent a house in a specific place.

This document is only an example for self study about how to use R and Latex.

“LaTeX is a document preparation system and document markup language. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX is not the name of a particular editing program, but refers to the encoding or tagging conventions that are used in LaTeX documents”.
